

The 10 Fundamental Flaws of Bias, Falsehoods & Inadequacies of Mainstream Science

1. It is Based on a Biased, False & Inadequate Epistemology of Immanuel Kant that **simply excludes experience as a source of knowledge, while he does not provide any proving arguments to do so;**
2. It Assumes that the Usage of Only the Intellect and our 5 Physical Senses is THE Way to obtain Truthful Knowledge, while the Intellect is actually Only an Instrument of Discernment (get Data & describe a First Analysis, Not to draw Definitive Final Conclusions with). This Premise Results in Only adhering to and imposing a Materialistic Intellectual Worldview;
3. It assumes it's justified to ONLY apply "Quantifications" and "Falsifications" for conducting Research, thereby limiting its Research and enabling Random Assumptions, Doctoring and Manipulation.
4. It assumes those "proven" (only not-Falsified) Hypothesis (Issue No. 3) can Simply All be Projected onto Reality, thereby further solidifying the Mere Materialistic and Random Paradigm of Life, Reality & Humanity;
5. It assumes ONLY DESCRIBING the Consequences and Processes of Phenomena and their Only Intellectually Quantified Hypothesis and Conclusions thereof IS Science, while remaining Clueless, Indifferent and Ignorant about WHAT set it all in motion, HOW and WHY;
6. It Ignores, Omits, Denies Qualities, including of our Soul, Spirit and the Spiritual World;
7. It has Not provided Any Answers that would Unambiguously solve the Mysteries & Meaning of Life;
8. Its Biased, False and Inadequate Approach Results in a Limited, Distorted & Untrue Worldview, Totally Lacking Logic and Reason – So "Merely a Self-Sustaining Belief-System";
9. Many of the leading scientists are corrupt, narcissistic, unscrupulous and malicious, publishing research under their name that does not belong to them or expressing their "scientific" opinion while that 1-on-1 comes from parties with self-centered goals which are evil and hostile to man.
10. Its developed Policies, Prognostications, Projections and Technologies lack Sound, Integrated, Coherent, Logic, Moral, Soul and Spiritual Assessments, Research and Content.

General Conclusion: These TEN FLAWS show that the policies regarding Nitrogen, just like those regarding COVID-19, its Kill-Job and the entire Climate Change debate, ARE BASED ON LIES.

On top of that, does the official narrative regarding those 3 Cases also show numerous inconsistencies, falsehoods, tampering and manipulation.

So, these TEN FLAWS show that it is TOTALLY USELESS to assume that Mainstream Science and everything it produces, in terms of data, cognition, projections, political advice, policies or technologies, would lead to unambiguously truthful explanations and improvements.

If Mainstream Science does NOT tamper with or manipulate research, then the results of that research and data could be relevant.

However, BECAUSE OF ITS SELF-IMPOSED LIMITED MATERIALISTIC APPROACH, it will therefore also ONLY represent A PARTIAL ASPECT of reality, viz. the physical reality, and is it NON-SENSE IT DICTATES EVERYTHING IN OUR LIFE, incl. politics, policies and business.

And therefore, we need to Re-Define & Expand our Worldview to provide us with a Sound Wholistic Worldview of Life & Truthful Knowledge.

This will endow us with Wise Approaches enabling us to make Benevolent Decisions with regard to our Personal Life, in the Business World as well as in Government and Politics.
